

We are an innovative growing company. Some of our services are delivered in collaboration with our affiliates network.

If you represent an institution, e.g., a University/Engineering School or a company, please send us a short mail outlining in which way your institution/company would like to collaborate.

If you are a freelance software or hardware engineer or a Ph.D. student, or a final year engineering student, please mail us in which way you would like to collaborate and attach your latest CV.

We are also open to take on student interns and are currently actively collaborating with the University of Valencia (UV). If you want to realize your end of term or master project with us, please send us a short CV indicating clearly your area of interest.

Please direct all mails to our *Affiliates Liaison Team* under affiliates@breezesolve.com
