

Smart Grid is a rapidly evolving field requiring expert knowledge in the areas of power engineering, as well as telecommunications, and informatics.

Our Smart Grid Services focus on consultancy activities for small to medium size energy companies and utilities that would like to get a better understanding of communication technologies and related aspects. We are able to advice on:

- Smart Grid telecommunication standardization activities.
- Wireless communications for Smart Grid.
- Wireline communications for Smart Grid.
- Sensing, automation, and control protocols.
- Home automation systems.

Please direct any specific inquiries to our *Smart Grid Team* under grid@breezesolve.com
