

Our core services comprise:

- R&D project proposal preparation, targeting Spanish national as well as European funding schemes.
- State-of-the-Art reports (Power line communications, Wireless communications, Smart Grid, Home automation).
- Training activities (custom made lectures, courses, hands on exercises).
- Smart Grid, home automation, and home energy management solutions.
- Algorithm development (physical layer, MIMO signal processing, OFDM, synchronization, digital filtering).
- Multilingual technical writing and editing (product documentation, press releases, marketing material in English, German, and Spanish).
