

BreezeSolve is a privately owned engineering and consultancy company, based in Valencia, Spain. Building on long standing experience in industry and academia, we are able to provide engineering and consultancy services in the areas of wireless and wireline networks, signal processing, and smart grid.

Our core services comprise:

- R&D project proposal preparation, targeting Spanish national as well as European funding schemes.
- State-of-the-Art reports (Power line communications, Wireless communications, Smart Grid, Home automation).
- Training activities (custom made lectures, courses, hands on exercises).
- Smart Grid, home automation, and home energy management solutions.
- Algorithm development (physical layer, MIMO signal processing, OFDM, synchronization, digital filtering).
- Multilingual technical writing and editing (product documentation, press releases, marketing material in English, German, and Spanish).
